

Mastering DevOps

Automating the Software Delivery Pipeline

About Ecorporate Trainings

Ecorporate Trainings is designed to empower professionals with flexible, engaging, and personalized training solutions that drive career growth and organizational success.

We offer a learner-centric experience that allows employees to access a rich repository of courses and resources anytime, anywhere, on any device. Our platform features intuitive navigation, clear progress tracking, and interactive content tailored to diverse learning styles and proficiency levels.

About the Course

Ecorporate Trainings brings you the unique opportunity to master the art of software development and operations using the DevOps Engineering course. Explore the world of automation and infrastructure management with topics like Jenkins, Ansible, Docker, Kubernetes, Prometheus, Grafana, and Terraform to gain practical knowledge and proficiency in the tools and techniques required for successful deployment, automation, and infrastructure management. Join us on this transformative journey and unlock your full potential in the dynamic world of DevOps.

Why Automating the Software Delivery Pipeline is Important?

Mastering DevOps and automating the software delivery pipeline is essential due to its ability to streamline the development process, minimize manual errors, accelerate deployment, and promote collaboration between development and operations teams. DevOps principles align closely with strategic business goals, enabling smooth collaboration between teams and facilitating them to quickly make well-informed decisions, leading to success and innovation in the digital age.

Empowered by DevOps, Organizations are Leveraging Automation and Collaboration to:

Accelerate software delivery, enabling faster time-to-market and increased competitiveness

Promote a culture of innovation and improvement, leveraging efficient deployment for strategic advantage

Monitor infrastructure and application performance in real-time, ensuring optimal system reliability

Customize development efforts based on user feedback and enhance customer satisfaction

Enable CI/CD pipelines with metrics and feedback loops to improve performance iteratively

Streamline operations, automate tasks, and optimize resource use

Program Details

Who should go for this Mastering DevOps Course?

The Mastering DevOps Course is for all professionals who are passionate in the field of automation and infrastructure management.

It is best suited for:

1. Entry Level Professionals

2. System Administrators

3. Cloud Professionals

4. Solutions Architect

5. Infrastructure Architects

6. Site Reliability Engineers

This course is relevant for people who want to learn how to build, test, and maintain infrastructure and tools so that software can be quickly developed and released smoothly. You will get hands-on experience on real-time use cases and assignments that are highly relevant to the corporate world.

Why Mastering DevOps: Automating the Software Delivery Pipeline Course from Ecorporate Trainings

Live Interactive Learning

- › World-Class Instructors
- › Expert-Led Mentoring Sessions
- › Master Class by Ecorporate Trainings

Lifetime Access

- › Course Access Never Expires
- › Free Access to Future Updates
- › Unlimited Access to Course Content

24x7 Support

- › One-On-One Learning Assistance
- › Help Desk Support
- › Resolve Doubts in Real-time

Hands-On Project-based Learning

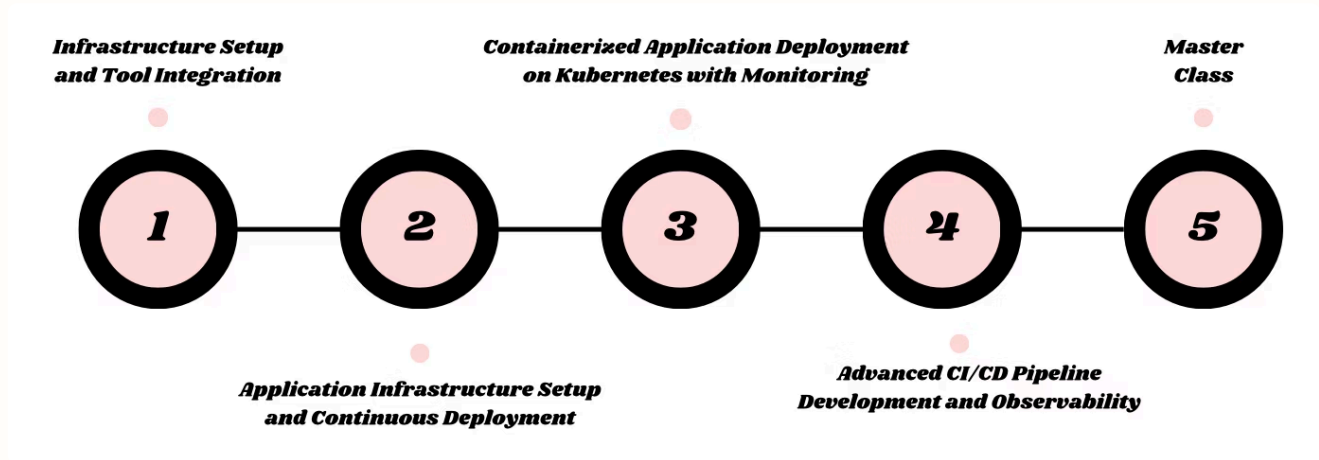

- › Industry-Relevant Use Cases
- › Course Demo Files
- › Assignments

Industry-Recognised Certification

- › Certification
- › Graded Performance Certificate
- › Certificate of Completion

Learning Path

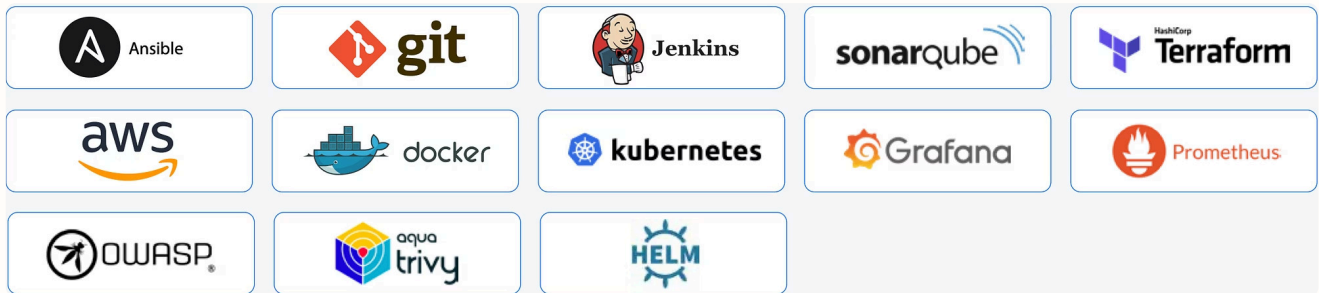

Skills Covered			
● Source Code Management	● Configuration Management	● Monitoring Resources	● Scripting and Automation
● Continuous Integration	● Container Orchestration	● Infrastructure as Code	● Performance Optimization
● Continuous Deployment	● Provisioning Infrastructure	● Security Practices	● Continuous Testing

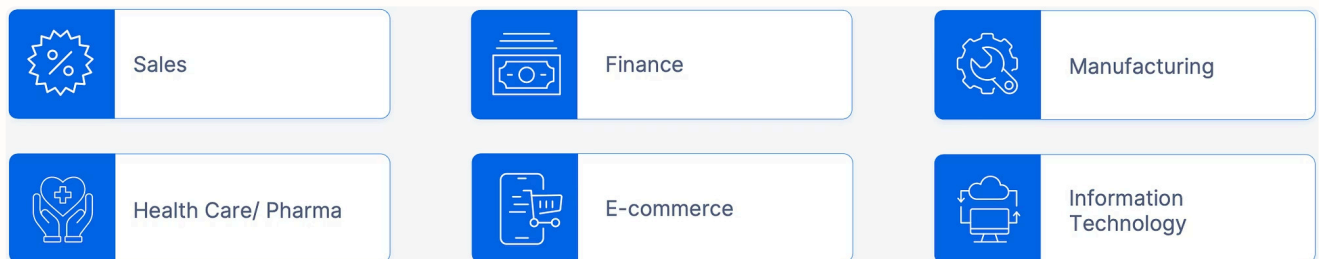

Tools, Frameworks, and Languages

In this course, we'll explore the essential tools, frameworks, and languages needed to excel in DevOps, enabling you to collaborate and deploy effectively.

The use cases and assignments will help you accumulate real-world experience in different industries, like:

Industry-recognized Certificate

Upon successful completion of the course, you will receive an industry-recognised certificate of completion from Ecorporate Trainings

Ecorporate Trainings
Transforming learners into leaders.

Completion Certificate

Mastering DevOps Course

This certificate is awarded to an individual or team that
has demonstrated exceptional work quality or results
in the relevant project.
